Amston, Bridgeport, Conn.

Dear Sir:-

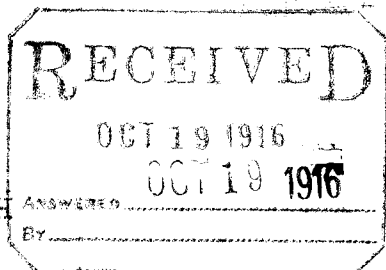

I have been told that you are considering getting your production under way at an early date, and in this connection, beg to inquire on behalf of The Bossert Company whether you have as yet contracted for your requirements in axle housings, brake drums, hubs, hub caps, or other pressed metal parts for your Sterling Cars.

My people in Utica are now probably the largest producers of miscellaneous automobile stampings in this country, and we would appreciate very much an opportunity of figuring on your specifications for any such parts.

I would be very glad to run up to see you in this connection at any time to suit your convenience. I presume it would be only a question of time anyway before you manufacture your own rear axle, and we would like to figure on the housing whenever such time might come.

Thanking you in advance for the courtesy of your advices,

Yours very truly,

LR/SH
